

Professional Summary

Results-driven engineering professional with 5 years of experience in project management in the construction and electrical industries across US and China. Certified **Project Management Professional (PMP)** with expertise in project coordination, risk assessment, budgeting, and procurement. Skilled in managing complex projects with multiple stakeholders and cross-functional teams.

Education

The University of British Columbia Master of Engineering Leadership: Clean Energy Engineering	Vancouver, BC Jan. 2024-Jan. 2025
The Pennsylvania State University M.Eng. Environmental Engineering	Pennsylvania, USA Aug. 2014-Aug. 2016
Guangxi University B.Eng. Environmental Engineering	Nanning, China Sept. 2008-Jul. 2012

WORK EXPERIENCE

Philip Ross Industries Environmental Engineer/Project manager	New York State, USA Apr. 2017-Apr. 2019
- Managed \$40 M+ USD water/ wastewater treatment plant construction projects for clients including public utilities and commercial developers, ensuring on-time and on-budget delivery. - Developed and tracked construction schedules (using MS Project), performed schedule updates, and cost reporting throughout the project lifecycle. - Reviewed and managed RFIs, submittals, and change orders; maintained document control logs and coordinated responses with consultants and on-site teams. - Collaborated with subcontractors, vendors, and engineers to resolve field issues and ensure alignment with project design specifications. - Supported project closeout processes, including as-built drawing preparation (using AutoCAD) and key documents archiving.	
Zhejiang Wellsun Intelligent Technology Co., Ltd. PMO Manager	Hangzhou, China Mar. 2021-June. 2022
Standardized the product development process and developed project management procedure that improved efficiency and project tracking, contributing to successful CMMI Level3 certification. - Served as the client-side project manager for Agile PLM and ERP implementation, coordinating internal stakeholders and external vendors, ensuring alignment with standards and business objectives. Reorganized the PMO team, guided and trained interns and junior engineers in basic knowledge of project management, improving skill proficiency ratings by 40%.	
R&D Center in Qingdao iTechene Technologies Co., Ltd. Project Manager	Hangzhou, China Sep. 2020-Mar. 2021

- Managed end-to-end smart electronic device development and IoT Integration projects, leading cross-functional teams and achieving 100% on-time delivery despite supply chain disruptions.
- Established **traceability matrices**, **issue-tracking logs**, and biweekly risk assessments, proactively resolving 15+ high-priority issues to prevent project delays.
- Delivered comprehensive project status reports to stakeholders and senior leadership tracking cost, schedule, and technical KPIs.
- Enhanced project lifecycle management procedures by optimizing design and change control processes, securing ODM certification from the overseas client.

Skills & Certificates

Software: Microsoft office Suite, Microsoft Access, Microsoft Project, Auto CAD, Tableau, GHGenius, Oneclick LCA

Certificates: Project Management Professional (**PMP**), Project Management Institute, Pennsylvania, 2020; Construction Safety & Health Certification (**OSHA-30Hr**), New York State, 2017; **NCEES-Fundamentals of Engineer** (Environmental), New Jersey, 2016;

Selected Projects

Study of Opportunities to Reduce Embodied Carbon in Commercial Building Retrofit

UBC, Vancouver

Capstone project with CBRE

Aug. 2024-Dec. 2024

- Conducted a comparative analysis of insulation materials for commercial retrofits, focusing on carbon footprint, durability, and market readiness.
- Proposed low-carbon solutions aligned with **LEED** and **BC Energy Step Code standards**.
- Utilized **life cycle assessment (LCA)** principles to evaluate environmental impact and proposed actionable strategies for clients to minimize embodied carbon.

New Iron Removal Facility Well #3&8 -Massapequa Water District

Long Island, USA

Project Manager

Mar. 2018-Mar. 2019

- Led coordination among management engineers, subcontractors and suppliers, obtained all project permits and ensuring project adherence to specifications and timely delivery.
- Identified and mitigated material and design risks, including pipeline layouts challenges and coating oxidation issues, securing client approval for improved solutions.

Multi-module Monitoring Project of People's Hospital of X Province

Hangzhou, China

Project Manager

Oct. 2020-Dec. 2020

- Lead the implementation of the second phase of the hospital logistics safety management platform.
- Collected fault feedback and real-time requirements, evaluated feasibility, and ensured alignment with stakeholder expectations.
- Managed risks by organizing technical brainstorming sessions to identify mitigation strategies, resulting in smoother project execution. Developed coping strategies for potential risks.
- Estimated risk: The construction team temporarily withdrew; Difficulty in construction; Hardware equipment installation problems and too long purchase time; Paper materials lost; Information deviation due to communication; Inspection and acceptance problems.
- Coping strategies: Arranged a backup construction outsourcing team; Coordinated the construction time in advance to ensure the effectiveness of monitoring point deployment and control; Increased hardware testing links and prepared in advance; Backup important data; Developed communication channels and methods; Carried out internal acceptance before formal delivery.
